

One-Design Value

J/22 is the choice of one-design fleets and institutional sailing programs worldwide, because she has proven to be a great value and a favourite among juniors and adults alike. The hull and deck are unyielding Baltek balsa cored laminates. All deck gear is first class and located in accordance with the latest class preferences.

J/22 has a comfortable self-bailing cockpit with 7 ft. long seats and room for 4-6 people in the cabin to escape the rain or cold. J/22 is also the key to financial success in managing public access sailing programs like Sail Newport. In fact, in 2004, Sail Newport replaced their fleet of 12 old J/22s with brand new ones.

J/22 is built for safety with buoyancy tanks and offshore hatches. Her 700 lb. lead keel lowers the centre of gravity, creating nearly 1700 foot pounds of righting moment at 90 degrees of heel.

There are over 1,550 J/22's now sailing in 65 active fleets in eighteen countries on three continents. Recognized by the ISAF, the International J/22 Class Association promotes activities and regattas worldwide. There is a very active class web site and association newsletters. For class racing, sails are restricted to only a main, small jib and spinnaker with total crew weight at 605 lbs.. There is still no better One-Design value available in a 22' keelboat
